Production of stainless steel mailboxes, orientation technology,  
communication boxes and special equipment

Dear readers,

8 million parcels are transported throughout Germany each and every day, and this number is growing parallel to constantly growing online trading. At the same time, customers are seeking increasingly specialised and individual services. The so-called “last mile” is a big headache for suppliers, in other words, the last stage of the delivery chain to the recipient’s home. Frequently, the item cannot be delivered at the first attempt. Logistics companies and recipients both suffer as a result. The recipient has even more stress since he or she has to fetch the parcel from a branch office or from neighbours. Instead of a trouble-free delivery straight to their own home, the recipient has even greater outlays in terms of time and money. Non-delivery means more administrative work for logistics firms, creating additional costs that cannot be covered in the long term. Experts are predicting that costs will soon have to be passed on to the recipient.

It’s clear that people waiting for parcels would prefer another, simpler, and above all, cheaper solution. That’s exactly what we’ve done! Parcels, documents or book deliveries - our clever, secure solutions, suitable for everyday use, guarantee access to and receipt of your deliveries 24/7.

A large variety of combinations makes our “MySmartBox” an absolute must for practically every use. Customised yet simple!

A product ordered from a trader can be picked up on the same day, even after opening hours. Goods ordered for express despatch will definitely be delivered - whether you’re at home or not.

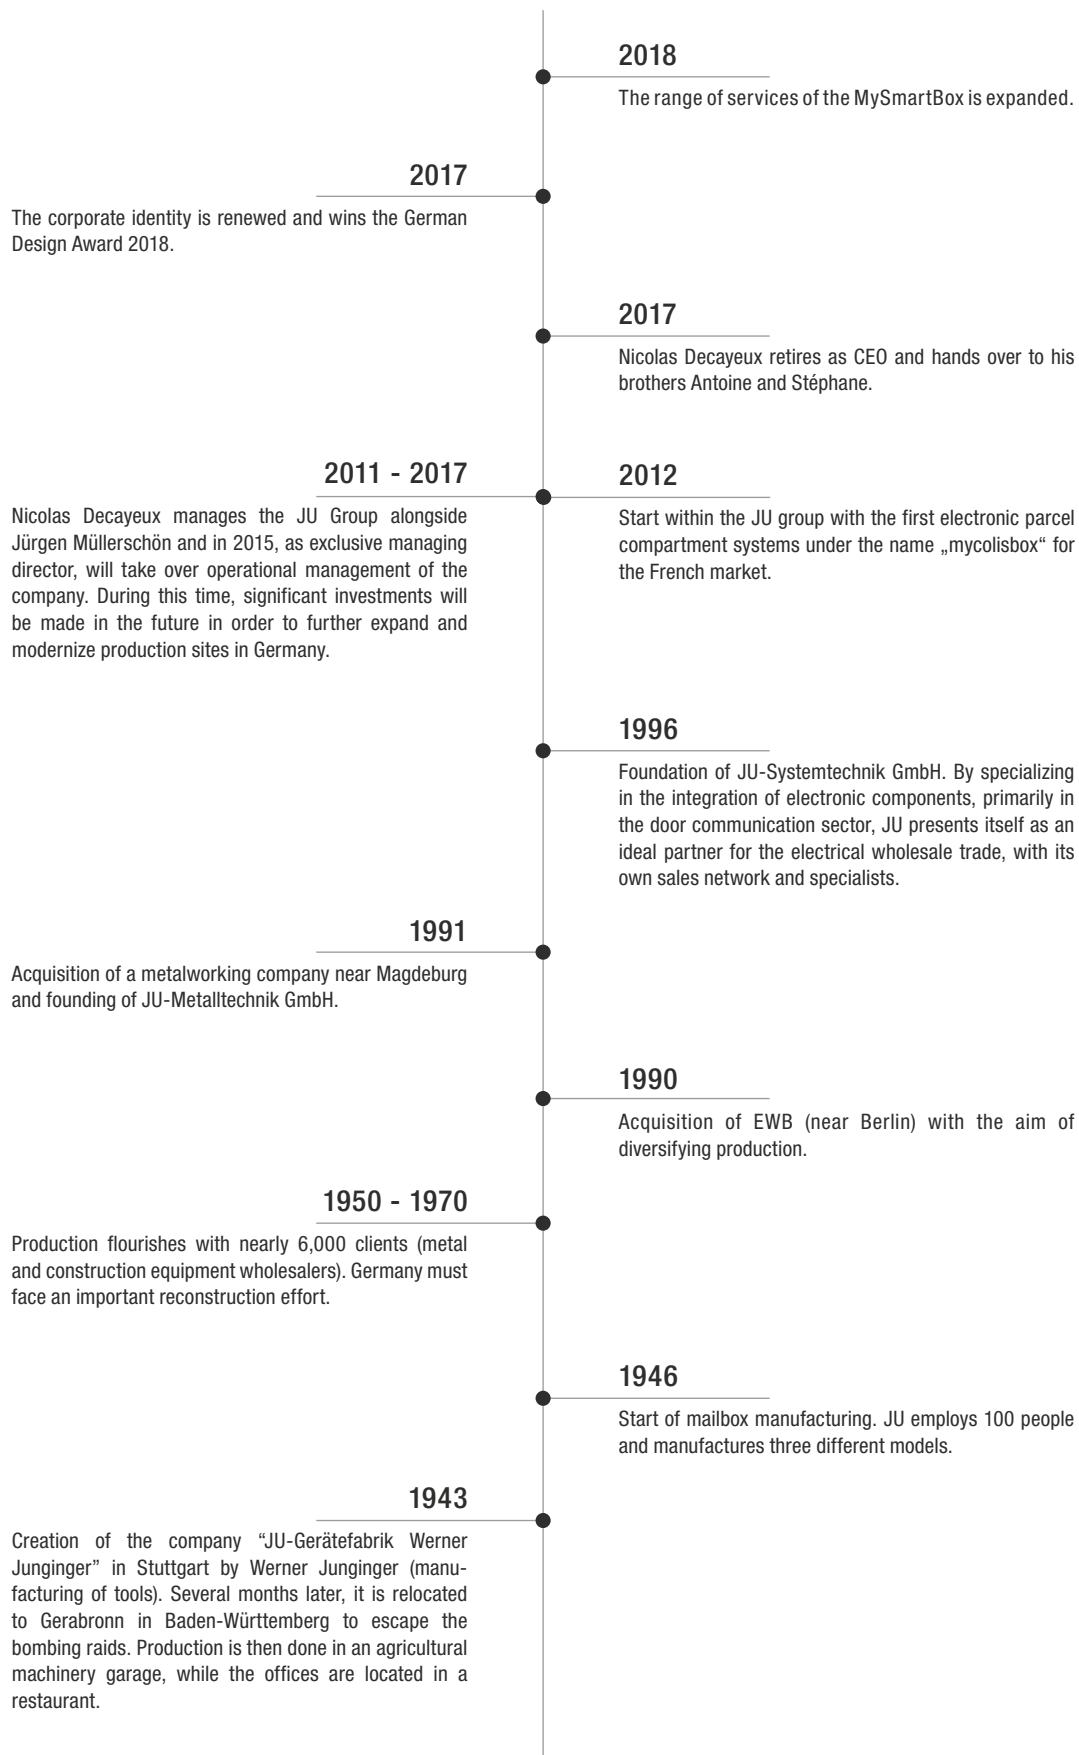

The “MySmartBox” has high potential for intralogistics processes too - independently of the receipt of private parcels during working hours, individual service providers can also be integrated into the system. For example, someone wants to have a personal delivery made, and at the same time take his supermarket order, supplied from the local service provider, from the specified locker. You can use your preferred method - payment by PayPal, EC or credit card, cash or many other types of payment. Information about the delivery is made via SMS and e-mail, using a code. Our customers can decide exactly how they want to take over ordered items, securely and according to their preferences.

We hope that you enjoy looking at our new brochure.

Kind regards,

The JU Metallwarenfabrik

## An optimal combination of online and offline trading

E-commerce is moving ahead at the same fast pace. Online trading is still enjoying strong growth. Market researchers forecast an annual growth rate of 7-8% for e-commerce retailing. The boundaries between online and offline trading will overlap increasingly in future. Consumers no longer rely solely on the Internet, but are making use of different channels, combining the benefits of online trading with those of stationary trade.

## Remain competitive - create added value

We have endeavoured to focus on providing innovative solutions to our customers. Customer satisfaction means increased sales.

In order to meet this goal, we have developed the "My SmartBox", which we use to network digital strategies with stationary trading. The benefits are obvious:

This customer specific drop-in and drop-off parcel systems give consumers the option of picking up their products and packages at any time, irrespective of opening times, even after work and with no additional despatch costs. The MySmartBox can be used by all KEP. There's also the option of integrating service providers in the surrounding area, e.g. bookshops or supermarkets, or neighbours.

Local traders can adapt to new consumer habits, generating additional sales. We're working together to increase consumer satisfaction, instead of competing against each other.

"MySmartBox" can also be operated for intralogistics and as an employee system. Employees have access to their tools or materials at all times, without having to

present a stocklist or go through long ordering processes. Provision of authorisation in the form of a staff ID enables them to buy or procure goods easily and conveniently at the place of use.

## Innovative vending solutions - improving existing systems

The German vending sector is on an upward trend, having developing into a healthy economic sector. For many decades now in Germany, vending systems dispensing goods after pressing a button have been indispensable to consumers, guaranteeing access to products at any time of the day or night.

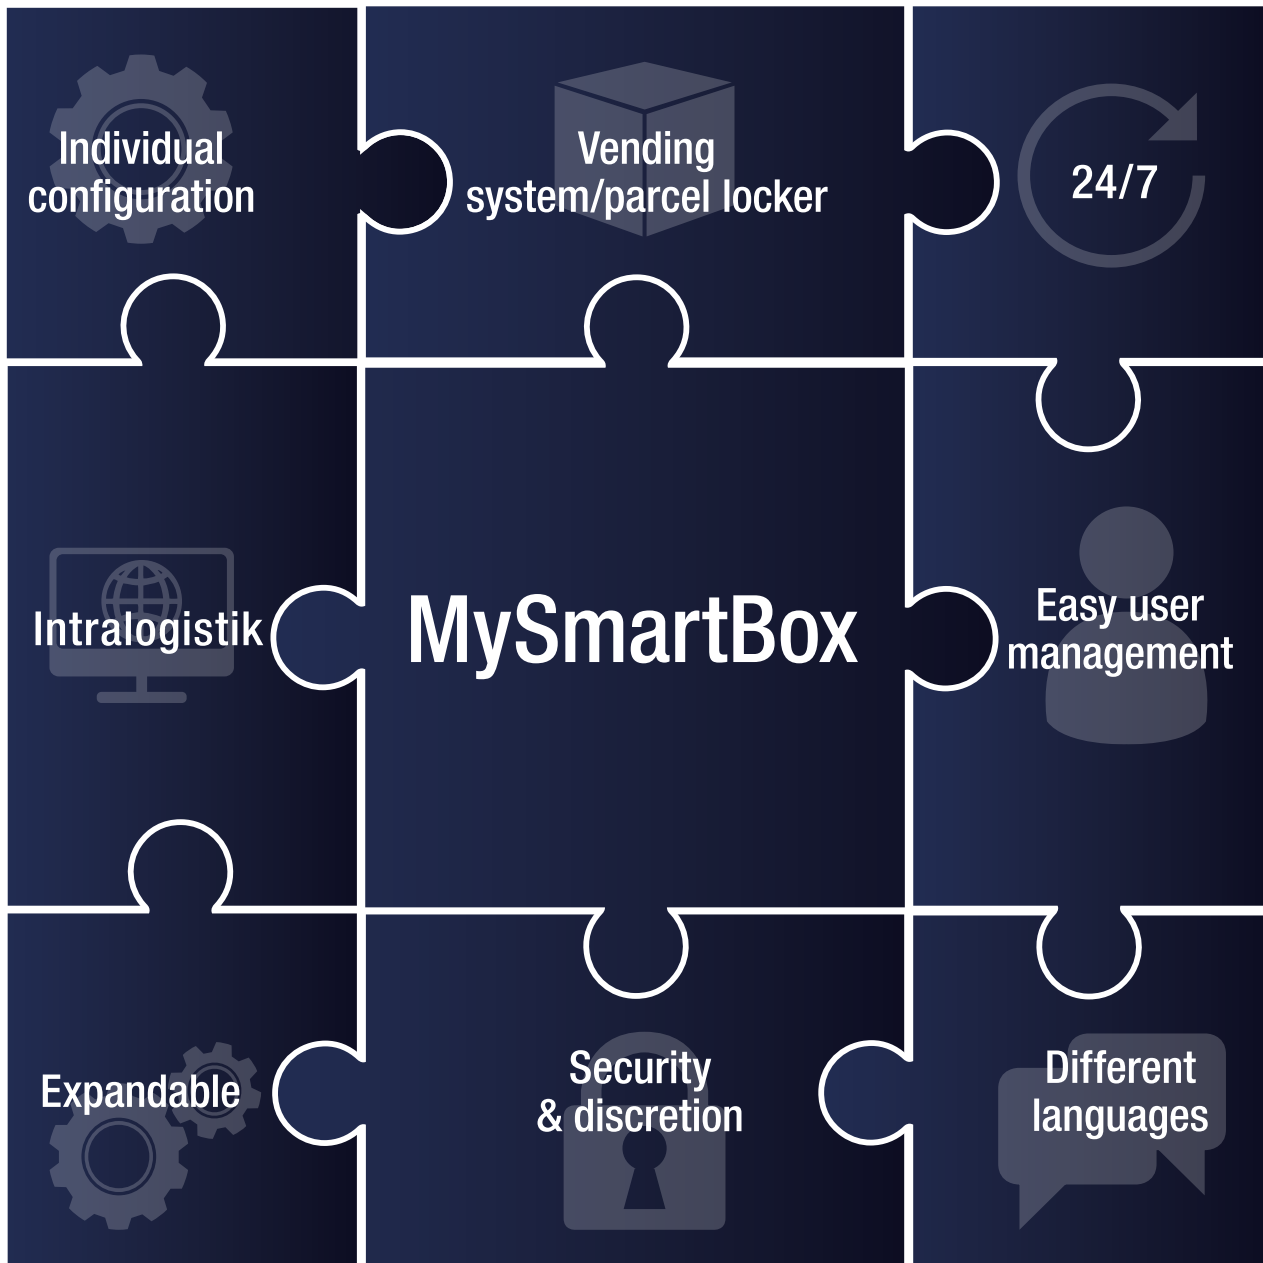

For the past 75 years, the JU Metallwarenfabrik has been a leading manufacturer of post boxes and parcel locker systems. Our expertise allows us to deliver a superior product.

As the first company to offer these services throughout Germany, our parcel locker systems have integrated intelligent systems for storing and distributing products of all kinds. This kind of system would be well suited to the automobile or telecommunications sector - for example, for faster procurement of spare parts. Our system can add value to the food industry, medical technology or healthcare products. Payment is made independently of customer requirements, either via an online payment service/ online system, by EC card or cash.

## High-end quality standard

We guarantee that our products are exclusively manufactured in Germany: top craftsmanship, premium quality, and professional!

To maintain our standards, we focus on high-quality materials guaranteeing long life for lasting value, combined with expert finishing made possible by innovative and well-engineered technology, carried out by our highly trained and qualified staff.

# JU What makes the “MySmartBox” so indispensable?

## Company

-  Increase in sales
-  Link from online to online trading
-  Customer satisfaction
-  Autonomous administration and simple user administration
-  Safe and confidential - electronic locking and robust finishing
-  Individual configuration
-  No unnecessary delays upon receipt
-  Cost savings
-  Increased attractiveness of rented objects, with increased benefits for residents
-  Little extra space needed when used in combination with postboxes
-  Reduction of the ecological footprint
-  Systems can be expanded at any time
-  Webshop integration possible
-  Option of accessing various sales statistics

## Customer/user

-  Convenient online orders
-  24/7 pick up possible
-  Messaging by e-mail / SMS
-  Fast availability
-  Storage must be supervised
-  Confidential pick up instead of from neighbours or parcel collecting point
-  Possible integration of other local service providers (e.g. linen, baked goods or other articles)
-  Return shipments (tentatively available as from autumn 2018)
-  Exchange or deposit of items independent of time (Apartment key handover, personal documents, tools and much more)

1

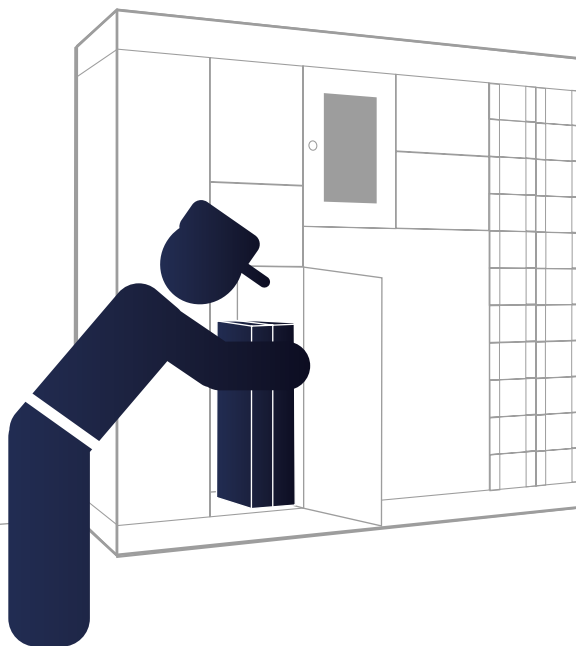

The delivery agent selects the recipient and locker size using a preconfigured list.

4

The recipient has only to enter the PIN from the e-mail or SMS, then the corresponding locker opens and the parcel can be taken out.

2

After the delivery agent has selected the corresponding locker size, the locker selected opens and he places the parcel in it. The procedure is recorded internally.

3

The control system automatically sends an SMS or e-mail, informing the recipient about the delivery and sends the access PIN for the locker.

# JU Vending system - Procedure for delivery and pick up

1

As usual KEP\* service providers can, at times chosen by them, fill the system with items ordered for customers from surrounding towns. No additional workload arises. All deliveries are delivered, as usual, on time and reliably. The system operation can create added value by personalising the vending system (using an order received) or filling it as desired (for goods that are selected and paid for on site).

2

The operator can decide when to fill the vending system. Individually designed locker sizes make it easier to store different product sizes.

5

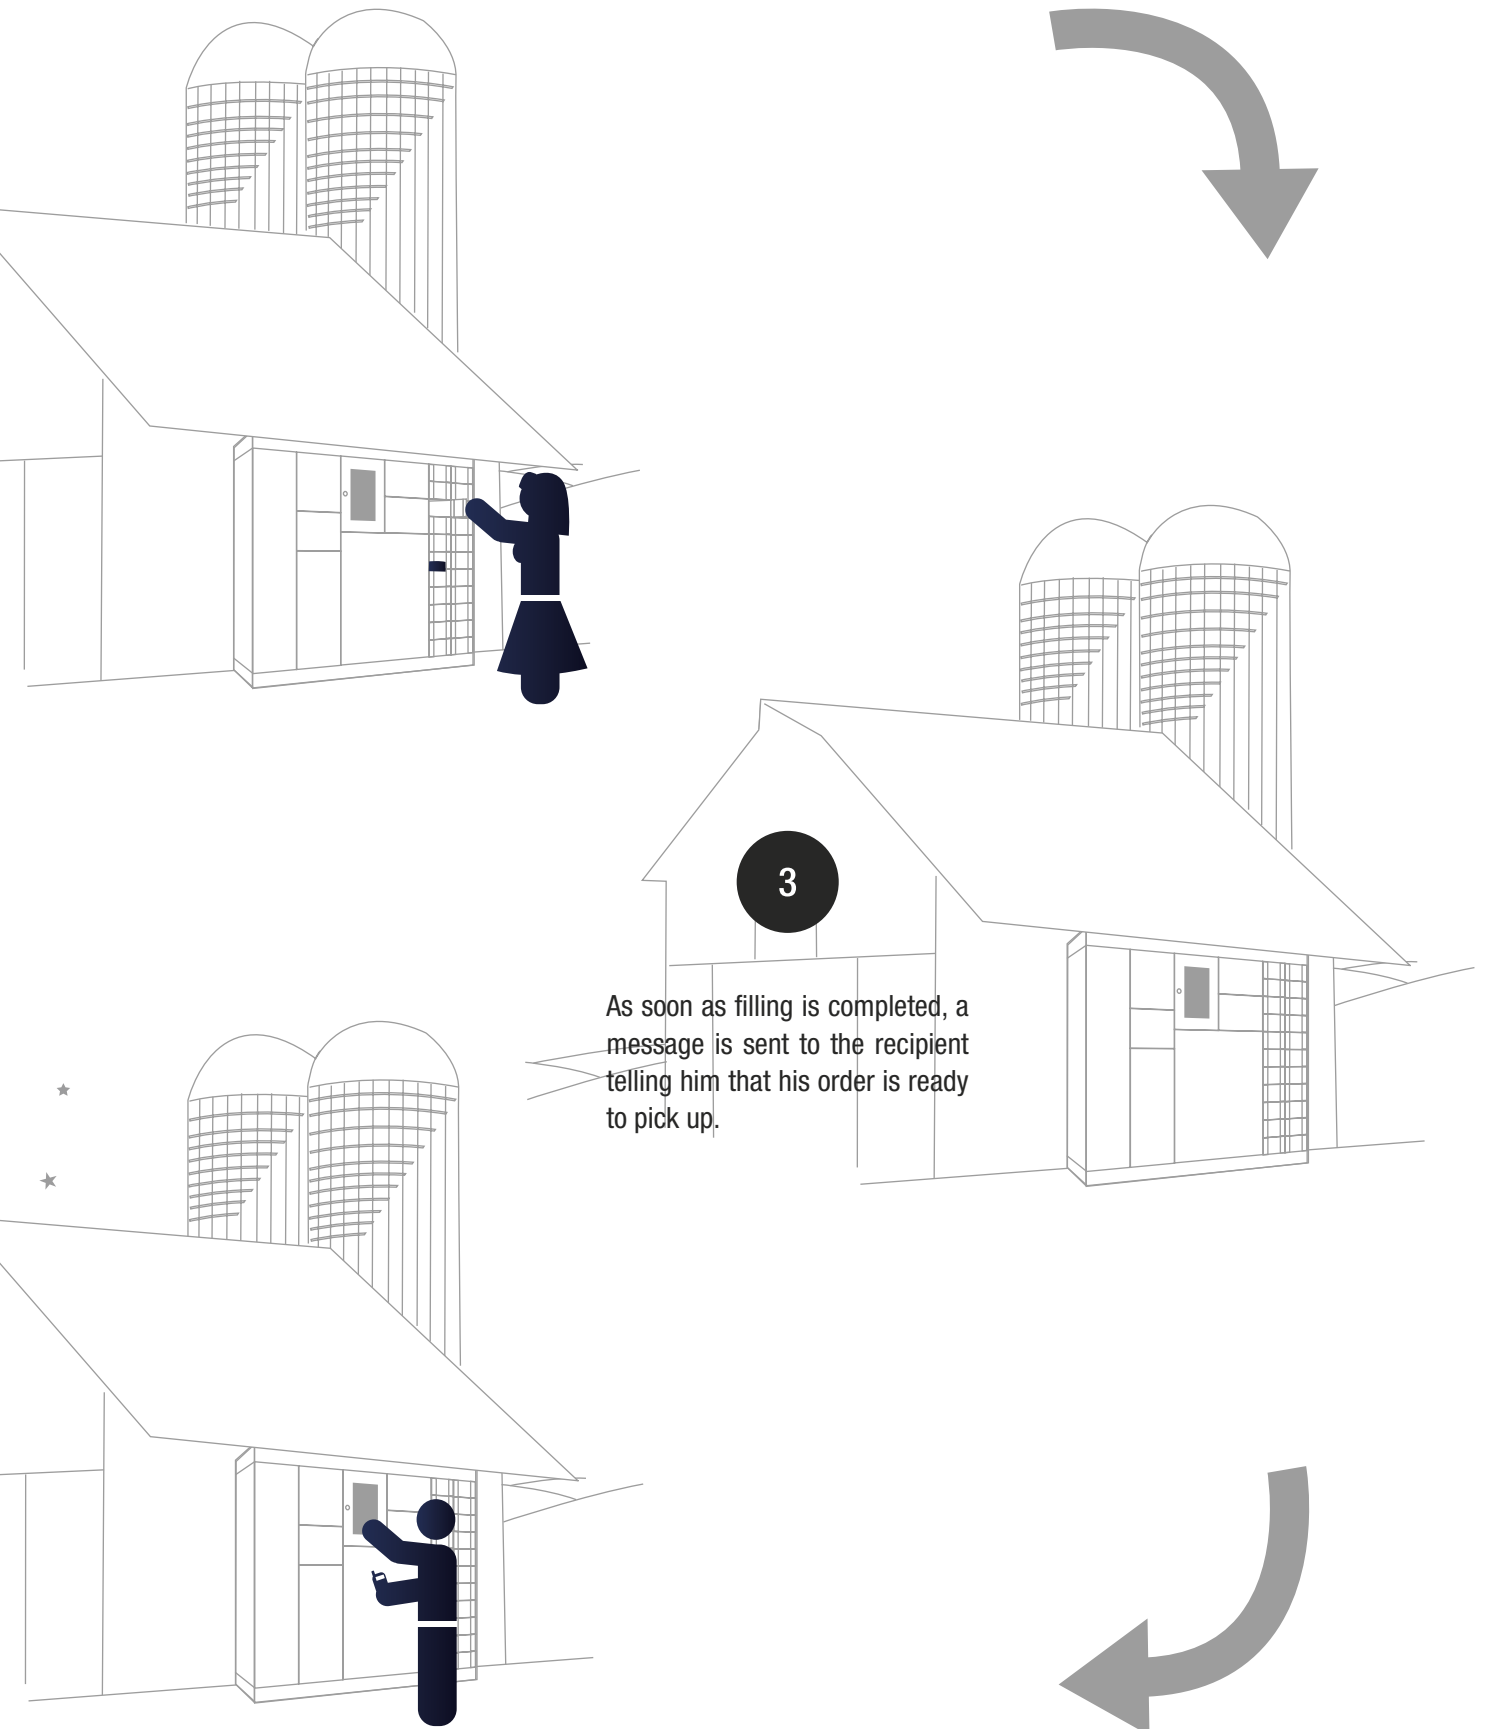

Using this technique, the recipient can buy the supplier's goods outside regular opening hours too.

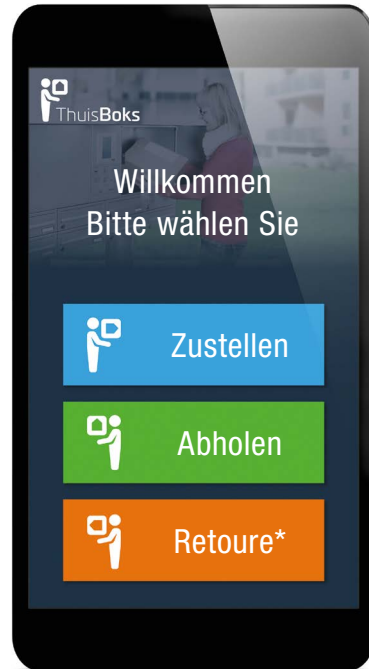

4

The recipient can now pick up his parcel with the corresponding PIN 24/7, whenever it is convenient to him.

# JU Touch panel - Parcel locker system, Vending system

1. You can move between the parcel locker system and vending system using the screen start page. Click on "Paket zustellen/abholen" to deliver or pick up.

2. "Zustellen" or "Abholen" can then be selected on the touch panel.

\* The "Retouren" function will probably be available as from autumn 2018.

3. You can move between the parcel locker system and vending system using the screen start page. Click on "Produkt(e) kaufen" to purchase one or several products from the vending system.

4. Products in the vending system can then be searched for using the locker numbers.

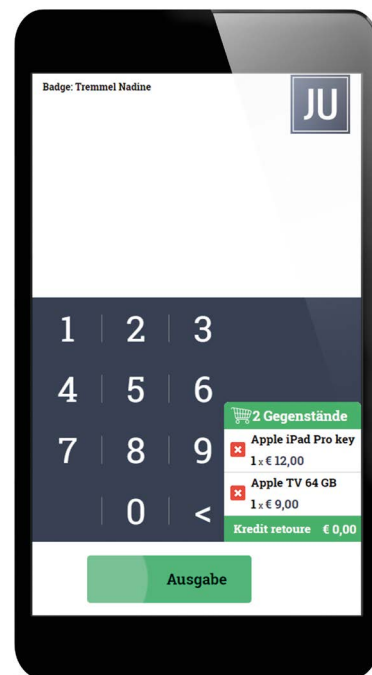

5. The selected product appears on the display and is added to the shopping cart.

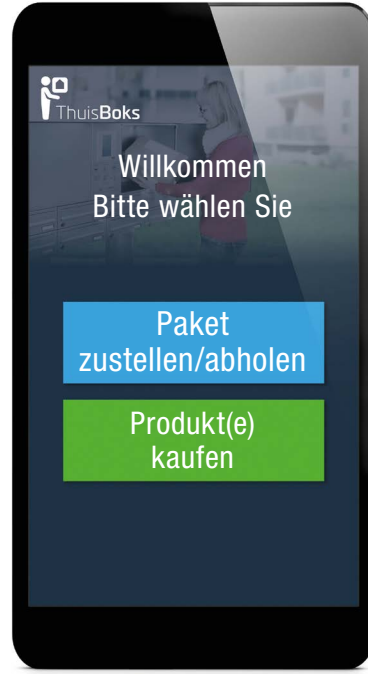

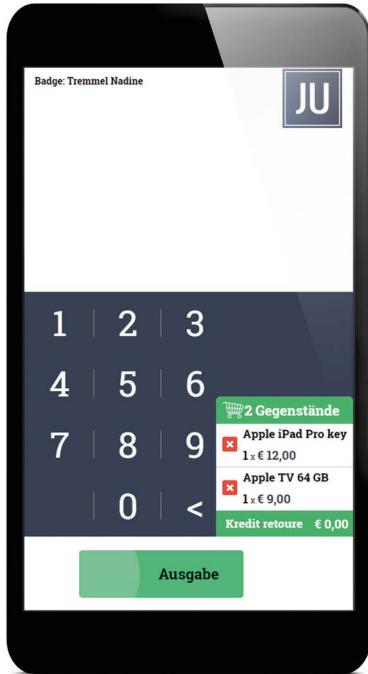

6. Further products can be added to the shopping cart according to the same principle. Products can be removed by clicking on the "X" next to the respective product.

7. To conclude the purchase, the goods have to be paid for. Various payment methods can be used to pay, e.g. RFID, credit card, PayPal, EC card.

8. In this example, you can see the payment method using a RFID chip. As soon as the goods are paid for, the corresponding lockers can be opened.

9. Purchasing is now concluded and the goods can be removed.

10. As soon as the goods are removed and the lockers closed, more products can be bought or parcels delivered or picked up via the screen starting page.

## Storage authorisations

The storage authorisation, also known as a safe place agreement, makes it possible for the delivery agent to leave parcels, even if the recipient is not present. The recipient's signature authorises the delivery agent to store his delivery at an arranged place, in this case in one of our parcel locker systems.

This saves having to go to the delivery agent on the next working day, or long waiting times. However, a separate storage contract has to be concluded with each delivery agent.

There are two different types of storage authorisations: a once-only storage authorisation and the general storage authorisation. In the event that a once-only authorisation is granted, a once-only storage of a delivery will be authorised from a despatcher to a certain location, whereas a general authorisation permits unlimited storage of all future deliveries at a certain location, until this is revoked in writing.

As soon as the parcel is put into storage, the despatcher's liability ends, since he is released from his liabilities.

## Warranty

JU grants a 5-year warranty to all components and a 10-year warranty against rust. During this time period, we will eliminate all bureaucratic and non-bureaucratic defects that are demonstrably based on material and manufacturing errors which substantially impair system functioning.

Furthermore, we have all spare parts available on a continuous basis, even for the models whose warranty period has already expired. However, please clarify the details with us at all times in order to avoid incorrect deliveries!

The following is not covered by the warranty: Damages resulting from non-observance of the instructions for use and maintenance, improper handling, vandalism or normal wear and tear. This also includes the field of electronic accessories. The warranty shall become null and void in the event of interventions by unauthorised persons. The manufacturer is not liable for damages caused by improper transportation, assembly, operation or use!

Please take an active part in environmental protection activities. Paper, cardboard and plastic from packaging are valuable raw materials that can be recycled. Separate the packaging waste and return it to the local collection points, because the economical use of raw materials is active protection of the environment.

## Delivery time

Indication of the delivery week means the date of dispatch from the factory or delivery warehouse.

## DIN standard

All our products marked with the DIN symbol comply with DIN EN 13724.

## Our delivery conditions

Our general conditions of sale apply to all deliveries and offers. All deviating arrangements require our confirmation in writing.

In addition, the statutory provisions apply.

Up to a net value of EUR 500.- delivery is not free of charge.

Starting from EUR 500.- delivery is free.

Up to a net value of EUR 150.- we charge a packaging cost of EUR 2.50.

Up to EUR 250.- 3.0 % of the net value

Up to EUR 500.- 2.5 % of the net value

Up to EUR 1000.- 1.5 % of the net value

Starting from EUR 1000.- 1.0 % of the net value

Postal shipping EUR 7.20

Package shipping/forwarding EUR 21.00

Freight forwarding EUR 40.00

## CE symbol

The conformity of our products with DIN EN 13724 as defined in the applicable guidelines corresponds to the current needs of the market. All products which meet these essential requirements are marked with the CE symbol (see fig.) and can be freely marketed in the European internal market.

## JU colour palette

The colour reproduction according to the JU colour palette on page 28 is only approximation. The RAL colour, the anodised colour and the RAL colour chart are binding for the precise colour.

Due to different material characteristics, a 100 % colour match is not possible. This also applies upon presentation of a colour sample. Therefore, certain colour variations are inevitable. In the event of slight colour deviations within the light-dark tolerance as well as in the case of anodised parts, slight deviations can be acceptable for the customer.

---

## Powder-coatings

The powder-coating for JU products has a layer density of 100 µm and is baked at approx. 200 ° C.

The colouring is possible with all colours of the RAL colour chart, whereby assemblies can be designed in different colour shades.

Assemblies made of aluminum can be provided with anodised coloured tones according to the colour table of the main catalogue.

---

## Dimensions

The dimensions are indicated in the following order: width - height - depth in mm. They are valid for each individual compartment with the DIN tolerances.

---

## Other information

Sales through specialised dealers only  
Price only for resellers

## Retention of title

The supplied goods shall remain our property until complete fulfillment of all claims and demands arising from the business relationship towards the customer, including possible interest on arrears and other costs.

The supplied goods may not be sold, pledged or surrendered as long as they remain our property. Should it be seized by a third party, we should be notified

without delay. The claimant should be notified that the goods are our property.

---

## Amendments

We reserve the right to make changes to the dimensions and finishes as a result of further development of our products, as well as amend prices.

Upon publication of a new price list, all previous price lists shall be deemed invalid.

---

Figures and illustrations may differ from the original.

No liability for printing errors

Issue 01/2018

**Anodised aluminum for aluminum parts**

Due to different material characteristics, a 100 % colour match is not possible. This also applies when a colour template is provided. Therefore colour deviations are inevitable. Anodised colours are possible from EV1 silver to C35 black. Anodised colour tones are available on request.

**Surcharge: Bronze anodisation 30 %**

**Standard colour shades (powder-coated)**

**Note!**

For printing reasons, 100 % colour match is not possible. The RAL colour chart is mandatory.
